

Class 3 Nightbrace

What a Class 3 Nightbrace does:

1. A Class 3 Nightbrace modifies the growth of the upper and lower jaws to drastically improve the function of the bite.
2. Improves the esthetics of the facial profile and prevents premature wear on teeth.

Important Considerations:

1. Wear your Class 3 Nightbrace in the evenings and while sleeping (12 hrs/night).
2. It does not need to be worn if a friend sleeps over or when sleeping at a friend's home.
3. A Class 3 Nightbrace can be worn while doing homework, watching TV, playing video games, etc.

Advantages of a Class 3 Nightbrace:

1. Completely removable - puts the patient in control
2. Modifies facial growth in a favorable way
3. Easy to use
4. Decades of research have shown that Class 3 Nightbrace wear while growing can reduce or eliminate the need for jaw surgery in many patients with underbites
